## OBJECTIVE

Fresh Computer Science Graduate from Imam Abdulrahman Bin Faisal University with a strong foundation in cybersecurity, and hands-on experience in artificial intelligence and full-stack development. Built a production-grade system as a graduation project, taking ownership of CI/CD pipelines, end-to-end testing, database migrations, and API integration. Seeking a Job to apply these skills and grow as a collaborative, detail-oriented software professional.

## EDUCATION

**Bachelor of Science in Computer Science** Aug 2021 – Jun 2026
**Imam Abdulrahman Bin Faisal University (IAU)** — Dammam, Saudi Arabia
GPA: 4.23 / 5.00 | Academic Standing: Very Good

## TECHNICAL SKILLS & SOFT SKILLS

**Programming Languages:** Python, TypeScript, JavaScript, SQL, C++
**Cybersecurity:** Penetration Testing, Network Security
**Development:** Next.js, React, REST APIs, Supabase, CI/CD (GitHub Actions), Testing (Playwright, Jest, Vitest), Linux
**Backend & Integrations:** Node.js (Express), Discord API (Bots, OAuth2), Web Scraping, Image & Audio Processing (Sharp, FFmpeg), Cloud Deployment (Railway)
**AI & Data:** RAG, LLM Integration (OpenAI, Groq), Vector Search (pgvector), Machine Learning, Data Mining
**Other:** Database Design (PostgreSQL, Supabase), Git & GitHub, Algorithm Design, Software Engineering
**Soft Skills:** Problem-Solving and Analytical Thinking, Attention to Detail, Team Collaboration and Communication, Adaptability and Self-Directed Learning

## EXPERIENCE

**Cooperative Trainee — King Fahad Medical City** Jun 2026 – Aug 2026
Remote • ASP.NET (C#) • SQL Server

- **Build:** Designed and built ClinicCare, a clinic appointment management web application — a SQL Server database (ClinicDB) with stored procedures, triggers, and indexes, and a full ASP.NET Web Forms (C#) app covering patient/doctor management, appointment booking with cascading filters, an admin dashboard, and role-based authentication (Admin, Doctor, Patient).
- **Deploy:** Added email notifications, report exports (Excel/Word/PDF), and backup/restore workflows; wrote a 55-check automated regression suite and deployed the application live to a production host.

## PROJECTS

**Jadwel — Hidden Gems Discovery & Scheduling Platform** 2025 – 2026
Graduation Project • Full-Stack Web • Next.js 16 • Supabase • TypeScript
A production-grade travel discovery platform for Saudi Arabia built with Next.js 16, React 19, TypeScript, and a full Supabase backend, featuring RAG-powered AI chat, an ML recommendation engine, and bilingual (Arabic/English) support across 45+ pages.

- **CI/CD & Testing:** Designed a three-stage GitHub Actions pipeline (lint → type-check → build, Playwright E2E on PRs, automated Vercel deploy) backed by 5 E2E suites and 11 Jest/Vitest unit and component test files.
- **Database & Security:** Managed 17 incremental Supabase SQL migrations and Row-Level Security (RLS) policies to enforce data isolation across traveler, guide, and admin roles at the database layer.
- **Service Integration:** Owned integration for five external services (Supabase, Google Maps, multi-provider LLM fallback, Hugging Face ML) across 69 API route handlers with consistent auth and error handling.

**Subtitle Timer — Automated Burned-In Subtitle Timing Tool** Personal Project
Python • PyTorch • OpenCV • Tkinter
A Windows desktop tool that automatically times burned-in (hardsubbed) video subtitles and generates ready-to-edit .srt files, replacing manual frame-by-frame scrubbing. Uses a custom-trained CNN (PyTorch → ONNX) plus a pixel-mask detector to separate back-to-back subtitles with no timing gap.

- **ML Pipeline:** Built an end-to-end pipeline — dataset creation, model training with data augmentation, ONNX export, and validated inference in a packaged desktop app.
- **Application:** Designed a Tkinter GUI with live video scrubbing and adjustable crop overlays; packaged as a standalone Windows executable via PyInstaller.

## CERTIFICATIONS

**Anthropic:** Claude 101, Claude Code 101, Claude Platform 101
**Saudi Council of Engineers (SCE):** Specialist Membership

## LANGUAGES

**Arabic:** Native
**English:** Professional
